saforever935@gmail.com

Profile

I have a really great grasp on how to treat and deal with people from studying Body Language and other fields, have a wide range of skills in different areas but they still correlate and enhance each other, so they make me what is called a Jack of all Trades, I can work at many positions and assisting other positions.

What drives me is a huge dream, so it keeps me going and getting better not just working as an average employee.

I am a team or solo player in the team as I can do both very well, since I already passed through both situations at the university with the projects.

I am a very good thinker and communicator so that's exactly what I am searching for, to find a team that can communicate well.
